                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        g
                                          which contains multiple IgE-binding epitopes. It was amplified from a peanut seed cDNA library using a primer (see AAT58683) based on an isolated Ara hil peptide (see AAW24151). The sequence shows significant homology with the conglutin family of seed storage proteins of other legumes. The gene is capable of producing a protein product in prokaryotic cells that is recognised by serum IgE from a large proportion of individuals with peanut hypersensitivity. Ara hil and Ara hi see AAW24149-50) can be used to raise monoclonal antibodies which are used in a specific two- site MAD ELISA for the detection of Ara hi or Ara hil (laimed). IgE-binding Ara hil antigen epitopes (see AAW24188- 33) may be used in vaccines to protect against allergic reactions to peanut standardise OS field)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               240
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       540

This cDNA clone, designated p18, codes for the major peanut allergen Ara hII (AAW22164), which contains multiple 1gE-binding epitopes. It was amplified from a peanut seed cDNA library using a primer (see AAM28683) based on an isolated Ara HII peptide (see AAW24151). The sequence shows significant homology with the conglutin family of seed storage proteins of other legumes. The gene is capable of producing a protein product in prokaryotic cells that is recognised by serum IgE from a large proportion of individuals with peanut hypersensitivity. Ara HII and Ara HI (see AAW24195-50) can be used to raise monoclonal antibodies which are used in a specific two-site MAb ELISA for the detection of Ara HI or Ara HII (claimed). IgE-binding Ara HII antigen epitopes (see AAW24188-93) may be used in vaccines to protect against allergic reactions to peanut allergens, e.g. anaphylactic shock. (Updated on 17-OCT-2003 to
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    120
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       61 GCAGTGGGAACTCCAAGGAGACAGAAGATGCCAGAGCCAGCTCGAGAGGGCGAACCTGAG 120

This invention relates to a novel isolated nucleic acid molecule encoding the peanut allergen Ara h I that has been identified in patients with a topic dermatitis. Specifically, it refers to a monoclonal antibody expecifically, it refers to a monoclonal antibody enzyme-linked immunosorbant assay (ELISA) used to detect and quantify the peanut allergen antipen. The present invention also describes by ridomas that produce two-site monoclonal antibodies specific for a peanut allergen that can be used in an ELISA to detect and determine the concentration of a specific peanut allergen in a food product or in food processing. Furthermore, it provides an expression vector and the isolated nucleic acid or its fraction can include a diagnostic label. Accordingly, these nucleic acids are useful for obtaining diagnostics with optimal concentrations of each allergen or for developing panels of mixtures of large numbers of recombinant allergens such that it can be used in immunotherapy for the treatment of food hypersensitivity reactions. This polynucleotide sequence is the peanut Ara h II allergen CONA (PSB clone) of the invention. NB. This sequence is identical to that
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                180
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      GCAACAGGAGCAACAGTTCAAGAGGGAGCTCAGGAACTTGCCTCAACAGTGCGGCCTTAG 420

Specifically, it refers to a monoclonal antibody enzyme-linked immunosorbant assay (ELISA) used to detect and quantify the peanut allergens, where the monoclonal antibodies have specificity for a selected peanut allergen antigen. The present invention also describes peanut allergen that can be used in an ELISA to detect and determine the concentration of a specific peanut allergen in a food product or in food processing. Furthermore, it provides an expression vector and the isolated nucleic acid or its fraction can include a diagnostic label. Accordingly, these nucleic acids are useful for obtaining diagnostics with optimal concentrations of each allergen or for developing panels of

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        099
mixtures of large numbers of recombinant allergens such that it can be used in immunotherapy for the treatment of food hypersensitivity reactions. This polynucleotide sequence is the peanut Ara h II allergen cDNA (P38 clone) of the invention. NB. This sequence is identical to that identified as SeqID 6.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              540
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       540
